- Database
PostgreSQL , MySQL
- Development Tools
Docker , Jenkins (CI/CD)
- Cloud Services
Google Cloud Platform
- worked with more than 5 services
including Compute Engine, API's and
Services, GCP Buckets

Experience

Software Engineer - BigThinkCode, October 2024 to Present

Worked with LLM and Neo4j to create a data cleaning platform, optimizing data processing workflows. Collaborating closely with the team, I continuously contributed to code quality improvements and streamlined project workflows.

Associate Software Engineer - BigThinkCode, October 2023 to September 2024

Developed a cab booking platform for both mobile and web application with real-time features and created APIs for seamless database interactions. Became proficient in React and TypeScript, building responsive interfaces. This experience solidified my foundation in software development practices.

Software Intern - BigThinkCode, March 2023 to September 2023

Acquired skills in both Web interface and backend architecture, contributed to the creation of a goal-tracking system. I collaborated with the team using Agile methodologies, enhancing my skills in project management and teamwork.

Education

Sri Venkateswara College of Engineering , Chennai
Bachelor of Engineering in Computer Science **CGPA : 9.0**
